

# ALEXANDROS MODESTOS MODIS

## INTRO

My studies as an Electrical Engineer are helping me to gain a wide range of knowledge and skills while I was part of a challenging and fast-paced academic environment. In addition, working with different people in different projects taught me to be collaborative, self-motivated, businesslike and capable of working under pressure. Having a vision for the future and a lot of ambitions, I work step by step every day for succeeding my goals.
